— HANDBUILT TUBE PEDALS —

Thank you for purchasing

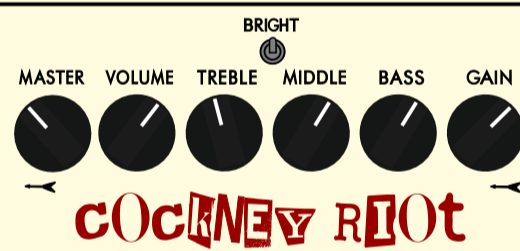

COCKNEY RIOT

Cockney Riot is the latest addition to our all-tube hand-built "pedal" series, which has been designed to create the most recognizable hard rock sounds that came out of the UK from the late 70s to early 90s.

The use of two 12AX7 tubes, working in the range of the normal amp plate voltages, gives you the feeling of playing a real tube amp.

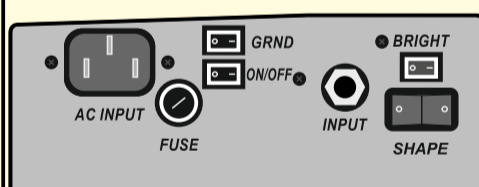

With its extreme dynamic range, refined attack, gutsy lows, well-defined mids, and sparkling highs, it picks up where the PlexiVibe left off, shining through a wide range of tones, from light crunch all the way to super high-gain.

Built like a tank, it features a powerful 3-gain stage architecture and a tightly focused EQ section. Additional EQ and drive tweaking switches, such as "bright", "mid-boost" "shape" and "comp" allow the most demanding players to dial in a full palette of dream tones, making the Cockney Riot a top contender in the high-end, boutique pedal league. From Hendrix to Clapton, ZZ Top to Van Halen and some AC/DC and Ozzy tones in between, the Cockney Riot delivers the goods in spades, whether you are playing blues, hard rock or heavy metal.

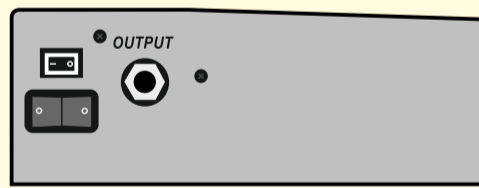

COCKNEY RIOT

- GAIN** Controls the gain level, from mild crunch to higher distortion sound.
- BASS** Controls the bottom end in your tone by adjusting the low frequencies.
- MIDDLE** Adjusts the mid frequencies from fatter to scooped. Increasing the middle gives you fatter sound, reducing the middle gives you a sharper, classic "scooped" tone.
- TREBLE** Controls the high frequencies, making your tone brighter.
- VOLUME** In conjunction with the gain control a variety of sounds can be achieved.
- MASTER** Controls the output volume level.
- BRIGHT SWITCH** 3-Way Switch for Volume, centre-Off

On/Off Bright Switch for Gain.
Shape Switch is a 2 Way, Centre-Off switch, trimming your sound according to its position.

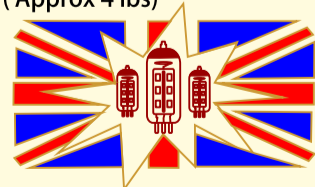

Ground Lift Switch to reduce or eliminate ground related noise.
On/Off Mid-boost Switch
Two-way centre-Off Switch for Comp.

ADDITIONAL INFO:

The Cockney Riot has been built from start to finish, exclusively by one person and all hand built. It includes a custom wound power transformer, which supply's optimum level voltages to its two 12AX7 tubes. NOS components have been used duplicating the sound and appearance of gear from the Golden Era of amplification. The components are mounted on 2,5mm epoxy board. The chassis is constructed solely from steel, hand painted with silk screened lettering. Complete By-Pass, with input of circuit grounded, is achieved from the relay which is activated by the Stomp Switch.

TUBES: 2 X 12AX7 (ECC83)
FUSE: 250 mA
DIMENSIONS: W 13,5cm x L 16,3cm x H 6 cm
(W 5,31" x L 6,41" x H 2,36")
WEIGHT: 1,9 kgs (Approx 4 lbs)

WARNING: TO PREVENT RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. REFER SERVICING TO A QUALIFIED TECHNICIAN.
CAUTION: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS EQUIPMENT TO RAIN OR MOISTURE.
